- Awarded a subcontract for Department of Commerce data resources

IBM State of Texas HUBZone Small Business Partner

- Awarded a long-term vehicle for IBM State of Texas task orders

IBM Diverse Business Partner

- Reselling IBM AI & Data solutions; and Storage solutions for Cloud & Infrastructure

IBM Equal Access Program for Federal Systems Integrators

- Introduction to IBM technology tools, training, coaching and teaming with the Federal Market team

Core Competencies & Overview

VOLTICAN
PEOPLE | PROCESS | TECHNOLOGY

Data & Analytics

- Data Analytics & Reporting
- Data Governance & Engineering
- Data Science & Machine Learning
- Large scale Data Migration
- Data mining & Transformation
- Machine Learning/ Deep Learning
- Robotic Process Automation (RPA)
- Facial Recognition Dev. (AI/ML)
- Data lake & Big Data

APP/ERP Solutions

- Program Management (PMO)
- System Admin & Config
- System Testing & QA
- RICEFW Development
- Data Integrity
- Business Process Dev.
- Change Management
- DevOps

Consulting & Staffing

- Staff Augmentation
- Permanent Staffing
- Retention/Training/Mentoring
- Application Managed Services
- Cloud Services
- Network Security
- Cyber Security
- Full App. Life cycle Dev
- Change management

Using Data Insight To Drive Process Decision

Why Voltican?

- Strong and Dedicated leadership with over 3 decades of combined experience in IT services
- Accountability system that empowers individuals and teams to take ownership of end-to-end project delivery
- Significant and measurable track record that has inspired many referrals and testimonials
- We use the right tool for the right job, we are not married to a particular Data & Analytics tool
- Available and accessible support system
- Transparent communication and customer support to ensure collaborative cooperation through project life-cycle

Staffing, Recruiting and Retention

We target Subject Matter Experts (SMEs) who have obtained certification in each area of specialty providing our customers with skilled and experienced personnel
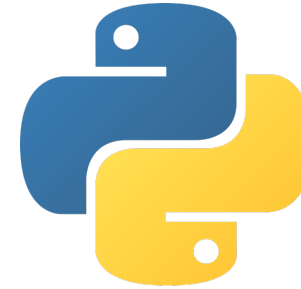

85% of Voltican's staff are highly incentivized, full-time W2 employees, mitigating turnover

Employees and interns are provided solid career paths and training, providing growth toward key positions within Voltican

Technological Expertise and Tools

- Voltican is a tools-agnostic company
- We use the right tools for the right job
- We have expertise in a wide range of methodologies and technologies:
  - Data Analytics
  - Data Mining
  - Data Engineering
  - Data Science
- We adapt to use the most relevant, industry-acclaimed, and efficient tools and process flows to get the job done.

Our primary customers

Voltican in partnership with Platinum is providing Enterprise Business Intelligence service for the US Department of commerce. The scope of which involves.

- Migrating existing cloud solutions from AWS to Azure platform.
- Data Engineering on Azure Government platform using Azure Data Flow, Azure SQL server platform service to meet the data processing requirement of the DOC.

- Data Analytics Reporting & Dashboarding, using Microsoft Power Platform Power BI to provide reporting and analytics capability of its data assets.

- Governance on MS Azure Platform using Azure Purview as a tool of choice to implement data governance practice within the organization.

Harris County Texas Engagement

On July 20, 2021, the Harris County Commissioners Court unanimously voted to establish ACCESS Harris County (Accessing Coordinated Care and Empowering Self Sufficiency). The goal of this initiative is to provide integrated service delivery through a no-wrong door approach for individuals in need of services across the county systems and community-based programs.

ACCESS Harris County aims to improve the lives of residents who are experiencing hardship and facing health challenges (physical and/or mental), financial and housing needs, substance abuse, and social inequity. One of the biggest obstacles faced by Harris County is a lack of integrated, meaningful, and actionable data required to better server its population.

Build leading-edge integrated data and technology to provide essential services to vulnerable communities and individuals in the County.

Enable the County's care eco-system to connect and deliver services with efficiency, effectiveness, and with compassion.

Utilizing both Red Hat OpenShift and Azure Platforms, ACCESS Harris will leverage the following components into a single, consolidated solution: Connect 360, MDM, IBM DataStage, SimpliGov, Cognos Analytics, and IBM Community Health Portals. Fragmented data from over 15 source systems will be integrated into one location for rapid analysis and seamless results.
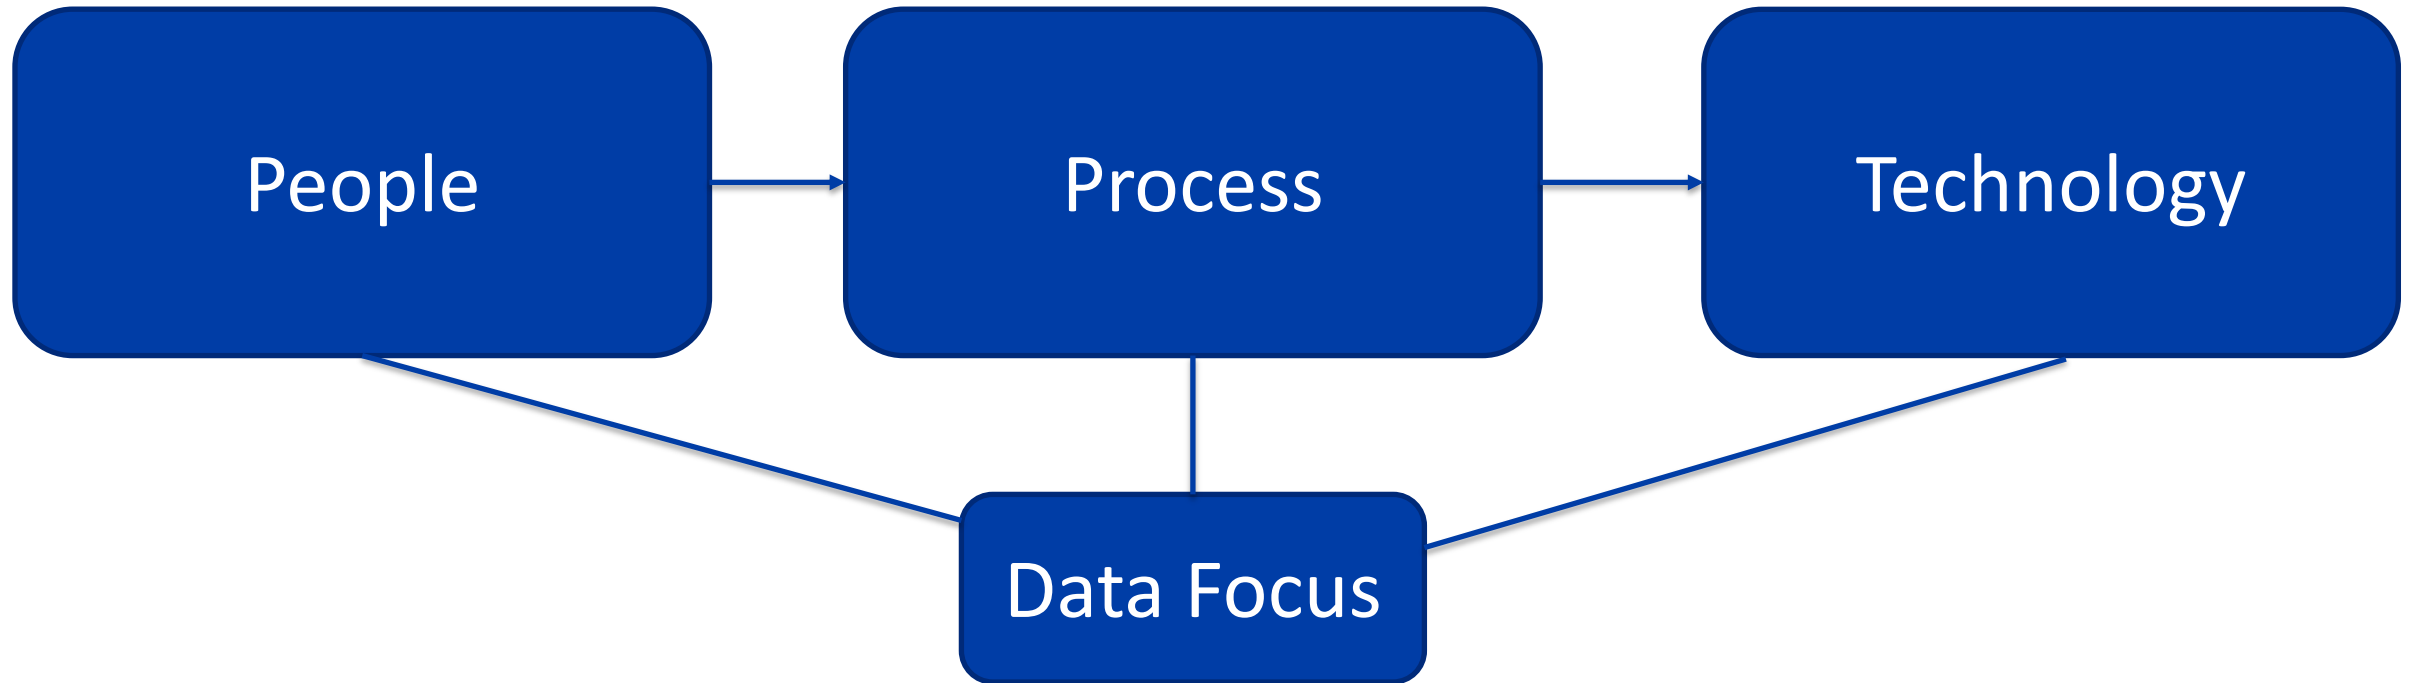

Ongoing Partnership Engagements

Key Client Partners	Customer Contract / Engagement	Type of Engagement
IBM + VOLTICAN	DIR CPO-4942	Data Engineering, Analytics and Reporting and ERP Services
IBM + VOLTICAN	DIR TSO-3996	ERP, Data Analytics solutioning, Enterprise Reporting and Dashboarding
